

Kyi from holding public office. Criticism of the document is a criminal offense. The true intent behind the proposed constitution is not the expansion of democratic principles. Its true purpose is to legitimize and make permanent the military junta and its brutal tyranny.

By awarding Suu Kyi the Congressional Gold Medal, we in Congress are letting the world know that the American people stand with Suu Kyi and the freedom-loving people of Burma and against the junta and the illegitimate charter it is propounding.

Whereas the Cystic Fibrosis Foundation urges all States to implement newborn screening for cystic fibrosis to facilitate early diagnosis and treatment which improves health and life expectancy;

Whereas prompt, aggressive treatment of the symptoms of cystic fibrosis can extend the lives of people who have the disease;

Whereas recent advances in cystic fibrosis research have produced promising leads in gene, protein, and drug therapies beneficial to people who have the disease;

Whereas innovative research is progressing faster and is being conducted more aggressively than ever before, due, in part, to the Cystic Fibrosis Foundation's establishment of a model clinical trials network;

Whereas, although the Cystic Fibrosis Foundation continues to fund a research pipeline for more than 30 potential therapies and funds a nationwide network of care centers that extend the length and quality of life for people with cystic fibrosis, lives continue to be lost to this disease every day;

Whereas education of the public about cystic fibrosis, including the symptoms of the disease, increases knowledge and understanding of cystic fibrosis and promotes early diagnosis; and

Whereas the Cystic Fibrosis Foundation will conduct activities to honor National Cystic Fibrosis Awareness Month in May 2008: Now, therefore, be it

FAA REAUTHORIZATION

Mr. REID. Mr. President, I had the opportunity to meet this afternoon with unions representing different airline entities. I also met with the owners and operators of airlines. We have a real problem on our hands. Fuel costs are now approaching 50 percent of the costs of our commercial airlines—50 percent. It used to be that the No. 1 cost, of course, was labor, personnel, but that is not the way it is. It is approaching 50 percent.

We are spending billions and billions of dollars, and most of that money is going to places we would rather it not go, to countries that have certainly nondemocratic forms of government, and a number of them are doing some very bad things with the money we are sending.
